Tom Robbins, Undergraduate Vice President

Club Life

Charter remains a place where students can thrive socially and academically. Our dining rooms are frequented by faculty and alumni, and weekly forum tables encourage open discussion among members. Throughout the club, Charter members study throughout the day in a variety of spaces. We hold a range of events including study breaks, movie and TV viewings, and live performances. Our upcoming social calendar includes our fourth annual Programming Cup, game tournaments, and House Parties.

Technology

Our popular computer cluster has six multi-monitor computers with top-of-the-line graphics and processors that are maintained regularly by our Tech Chair. In addition, Charter's new website gave members and prospective members a centralized online system to interact with the club. It is maintained by a team of undergraduates in the club. The website focuses on improving the sophomore and member experience with Club events and menus. Last semester we rolled out our webstore, where alumni can purchase club gear online.

Service and Sustainability

Soon, Charter will be hosting one of our favorite events, the Chartan Auction. This event encourages club members, especially our new sophomores, to get to interact and get to know each other in addition to raising money for chairity. Last semester, the auction raised over \$1,500 that was donated to our club's community partner Isles. Founded in 1981 by a Princeton graduate, Isles is an organization focused on community development and environmental stewardship in Trenton. We hope to surpass this amount this year, and to continue to work with Isles on different projects in order to continue to develop the relationship between the organization and the club.

Upcoming Renovations

Charter's Grad Board is working with Ford3 Architects to develop plans for renovating the Clubhouse in the upcoming years. The designs include additions to make the club fully ADA compliant and to improve the ventilation throughout the club, which will improve the membership experience for students and the professional experience for staff.
